Strategies Used To Treat Alcoholism In Addiction Rehab

by Louisville Addiction Treatment Center | Nov 27, 2022

Addiction can be a challenging and isolating struggle, but it is important to remember that you are not alone. If you are seeking addiction treatment in Louisville, Kentucky, there is hope.

Alcoholism is an addiction to alcohol. Doctors refer to it as someone who is unable to control how much alcohol they consume. Many alcoholics also have trouble with their emotions when they aren't able to drink alcohol.

It can be difficult to admit having a problem with alcohol but there are many treatment options available to those who want to stop drinking. So, what are the treatment options for someone struggling with alcohol consumption?

Rehabilitation Programs for Alcoholism

For many people with an alcohol problem, a rehabilitation center is the only option. Taking yourself away from the temptation of drinking by entering an addiction program is the best way to start your detox.

Not only because a large amount of your time will be spent at the treatment facility but also because you'll have access to all the support you need as you come through the toughest part of rehab.

There are many programs to choose from when you start your recovery from alcoholism. Some centers offer inpatient programs where you can stay at the facility while you go through detox. Others offer outpatient or intensive outpatient programs that allow you to carry on with your life while receiving treatment.

Medications for Alcohol Withdrawal

Medication often goes hand in hand with rehab. Most people who go through detox with an alcohol addiction are prone to developing withdrawal symptoms. Symptoms can be anything from headaches and nausea to tremors and hallucinations.

Some symptoms are so intense that patients often feel like picking up a drink to stop them. Medications can help ease the withdrawal symptoms until they pass and the detox phase is over. If you enter a rehab program, you'll have access to these medications and medical professionals will be on hand to offer support.

Therapy Approaches for Alcohol Addiction

Any addiction comes with physical, mental, and emotional consequences. Therapy is part of recovering from an addiction wholly, as opposed to just physically. Therapy can offer useful coping mechanisms for when you're faced with temptations in everyday situations.

It can teach you to recognize your triggers and avoid situations where you may be tempted to reintroduce drinking to your life. You'll learn to recognize behaviors that may have led to poor relationships in the past and how to build new and lasting support systems for yourself.

Most importantly, you'll learn how to set goals for the future and look ahead in a positive way. Looking towards the future as an opportunity for a good and healthy life is a great way to finish your treatment program and start anew.

Finding the Right Treatment for Alcoholism

Not every treatment is right for everyone. What works for you will depend on your situation and what you want to get out of it. At Louisville Addiction Treatment Center, we offer a range of different treatment programs to combat alcoholism. You can choose a program that works for you.

Just talk to our professional and friendly staff about your situation and we'll recommend a program that will have the best chance of success for you. Contact us today for more information.
